

Netskope Secure Cloud

Safe cloud enablement deployed on-premises

Bridge the gap to the cloud

The Netskope Secure Cloud™ is the industry's first on-premises cloud access security broker (CASB) that meets the most stringent data residency, privacy and regulatory requirements, enabling enterprises to take advantage of cloud apps while maintaining security and compliance.

Netskope Secure Cloud has been designed for customers in industries and geographies that have observed the same uptake of cloud services as other industries yet require tighter reins over sensitive data. This need can be driven by broader regulatory rules like Payment Card Industry Data Security Standard, the EU General Data Protection Regulation, or industry-specific rules like the Health Insurance Portability and Accountability Act (HIPAA).

Where this comes into play in controlling cloud apps is when enterprises examine security metadata collected from cloud app usage in order to achieve compliance. Netskope Secure Cloud provides these highly regulated organizations with a viable option for safe cloud enablement without sacrificing the advanced capabilities of Netskope's flagship cloud offering, the Netskope Active Platform™.

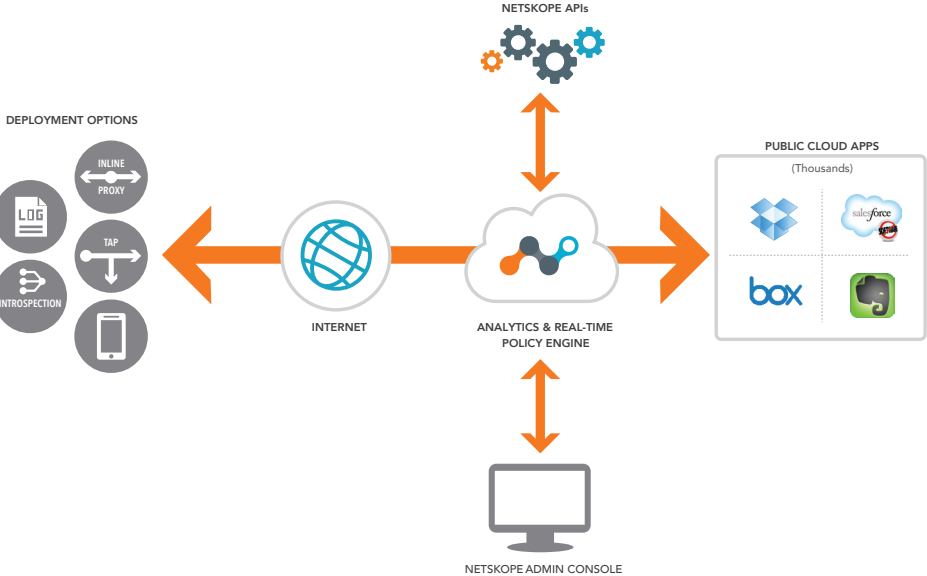

Netskope™ is the leader in safe cloud enablement. With Netskope, IT can protect data and ensure compliance across cloud apps so businesses can move fast, with confidence.

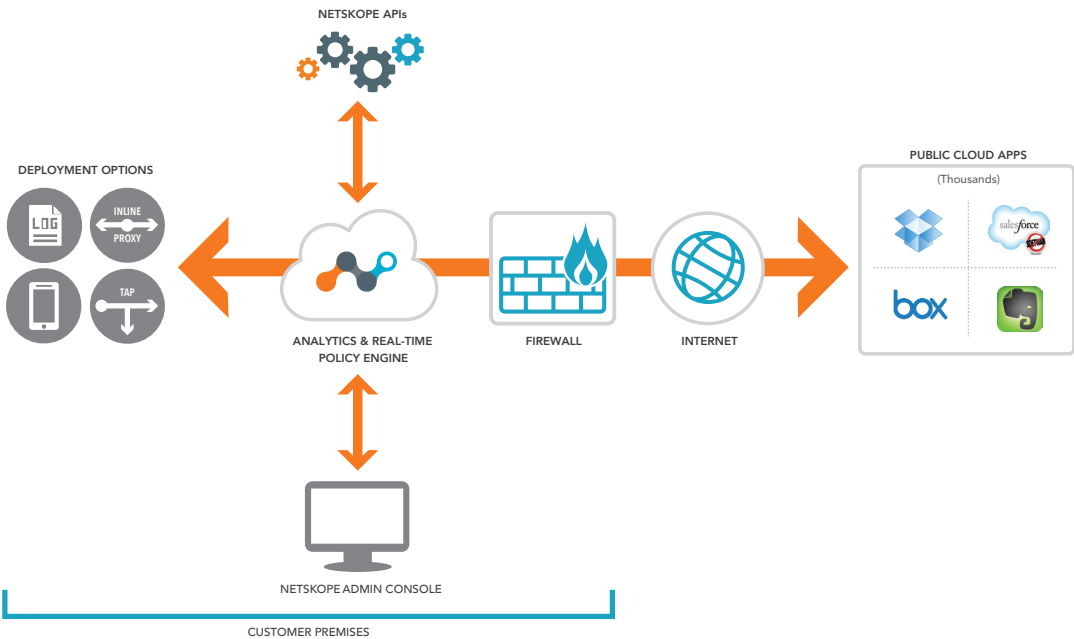

Deploy Netskope in the cloud, on-premises, or hybrid

The Netskope Secure Cloud is a fully private, on-premises version of Netskope's SaaS-based platform and provides customers the flexibility of choosing to deploy CASB in the cloud, on-premises, or via a hybrid approach.

Netskope in the cloud

Netskope Secure Cloud specifications

	N1000	N5000
Form Factor	1U	2U
Dimensions (DxWxH)	661.7mm x 438mm x 43mm	670.4mm x 438mm x 87mm
Management mode	Yes	
Event storage	240M events	1.2B events
Event retention capacity	90 days @ 200M logs/day	90 days @ 1B logs/day
External event retention	REST API	
Log-parsing mode	Yes	
Volume	300-500 GB/day	
Decrypted-tap mode	Yes	
Inline enforcement mode	Yes	
Main interfaces	2x10GbE Copper, quad speed with zero-delay bypass	
Secondary connectivity	4x1GbE Copper, tri speed.	
Storage	Solid State RAID, with battery backup	
Tamper resistant chassis	Yes	
Cooling	Front to back	

About Netskope

Netskope™ is the leader in safe cloud enablement. The Netskope Active Platform™ gives IT the ability to find, understand, and secure cloud apps. Only Netskope empowers organizations to direct usage, protect sensitive data, and ensure compliance in real-time, on any device, for any cloud app so the business can move fast, with confidence.

Netskope serves a broad customer base including leading healthcare, financial services, high technology, and retail enterprises, and has been named to CIO Magazine's top 10 cloud security startups and a Gartner Cool Vendor.
